CAMPBELL MEASUREMENT AND CONTROL MODULE CR10 OPERATOR'S

In computing, floating point operations per second (FLOPS, flops or flop/s) is a measure of computer performance, useful in fields of scientific computations that require floating-point calculations. For such cases it is a more accurate measure than measuring instructions per second.. The similar term FLOP is often used for floating-point operation, for example as a unit of counting floating ...

FLOPS - Wikipedia

A physics processing unit (PPU) is a dedicated microprocessor designed to handle the calculations of physics, especially in the physics engine of video games.It is an example of hardware acceleration.. Examples of calculations involving a PPU might include rigid body dynamics, soft body dynamics, collision detection, fluid dynamics, hair and clothing simulation, finite element analysis, and ...

Make everything on your computer faster Memory is a component in your computer that allows for short-term data access. Since your system's moment-to-moment operations rely on short-term data access â€” loading applications, browsing the Web or editing a spreadsheet â€” the speed and amount of memory in your system plays a critical role.
