ISCEON® MO89 is a non-ozone-depleting HFC retrofit refrigerant for R-13B1 in very low temperature direct expansion refrigeration systems.

ISCEON MO89 | Linde Gas

R508B (SUVA 95) R508B, also known as SUVA®95, is an HFC/PFC (Perfluorocarbon) blend designed to be a replacement for R503 or R13 in very low temperature refrigeration systems, such as environmental chambers and biomedical freezers.

R508B (SUVA 95) | Linde Gas

R134a is an extremely common refrigerant used in a wide range of refrigeration and air conditioning applications, including medium and high temperature refrigeration (both domestic and commercial), residential & light air conditioning, automotive air conditioning and industrial applications such as centrifugal chillers.
