

### **the logistics and supply pdf**

Logistics is generally the detailed organization and implementation of a complex operation. In a general business sense, logistics is the management of the flow of things between the point of origin and the point of consumption in order to meet requirements of customers or corporations. The resources managed in logistics can include physical items such as food, materials, animals, equipment ...

### **Logistics - Wikipedia**

Military logistics is the discipline of planning and carrying out the movement and maintenance of military forces. In its most comprehensive sense, it is those aspects of military operations that deal with: Design, development, acquisition, storage, distribution, maintenance, evacuation, and disposition of materiel. Transport of personnel.

### **Military logistics - Wikipedia**

What is Green Logistics? Logistics is the integrated management of all the activities required to move products through the supply chain. For a typical product this supply chain extends from a raw material source through the production and distribution system to the point of consumption and the associated reverse logistics.
