In the field of psychology, cognitive dissonance is the mental discomfort (psychological stress) experienced by a person who simultaneously holds two or more contradictory beliefs, ideas, or values. This discomfort is triggered by a situation in which a belief of a person clashes with new evidence perceived by that person.

Dementia is common in the elderly. 10% of persons over age 65 and up to 50% over 85 have dementia. AD and MCI differ from normal aging. Know the ten warning signs of AD.

DETECTION, DIAGNOSIS AND MANAGEMENT OF DEMENTIA

The 10 percent of the brain myth is a widely perpetuated urban legend that most or all humans only use 10 percent (or some other small percentage) of their brains. It has been misattributed to many people, including Albert Einstein. By extrapolation, it is suggested that a person may harness this unused potential and increase intelligence. Changes in grey and white matter following new ...
